Personal statement

I am a Computer Science graduate with a background in graphic design and UI/UX. I have experience working with digital tools, creating user interfaces, and collaborating with teams to improve usability. I am interested in software development and IT support, and I am eager to learn and grow in a professional environment.

Experience

Graphic Designer & UX/UI Designer – CCTechET

- Designed digital content and user interfaces using Figma and Adobe tools
- Worked with developers to support implementation of UI designs
- Improved usability and consistency of web interfaces
- Collaborated with team members to deliver digital products

Graphic Designer – Yemuyaweg

- Created branding materials and promotional graphics
- Developed visual content for social media and marketing
- Followed brand guidelines to maintain consistency

Projects

- Netflix Clone (React.js) - Developed a dynamic movie browsing interface with reusable components and categorized content sections.
- Apple Website Clone (React.js)- Designed a modern product showcase interface with smooth layout structure and responsive UI elements.
- Tour & Travel Website (PHP, HTML, CSS) - Created a travel website with clean layout, structured navigation, and user-friendly interface to improve user experience.
- Employee Management System (Java – File-based) - Developed a file-based application to perform CRUD operations for managing employee records.
- Online Learning Platform (PHP) - Built a web-based learning system where instructors can create courses and students can enroll, track progress, and receive certifications
